## FAQs about our pricing

### Do you offer educator discounts?

Edison robots are designed for the classroom – and so is our pricing. Our educator discounts are pre-built into our pricing in the form of bundle-packs and bulk discounts.

#### About bundle packs

Designed for schools, libraries, makerspaces and clubs, our bundles offer Edison products in quantities that make sense for educational spaces. By bundling together products, we are able to reduce the cost per product in each bundle. That's why a single Edison robot is \$49 USD, however, in a class pack of 30 robots, each unit is discounted to \$33 USD.

This bundle discounting is automatically applied to orders placed through our website and in the prices listed on the quotes we provide.

#### About bulk discounts

We understand that your needs may not always come in nice round numbers, which is why we honour bulk discounts for lone products made in the same order as larger bundles.

If you purchase a bundle and any additional lone products in the same order, you will be charged the bundle unit price on all applicable items. For example, a single unit of Edison is \$49 USD, however, in a class pack of 30 robots, each unit is discounted to \$33 USD. An order of 31 robots will be calculated using the discounted per unit price for the class 30 pack for all robots: 31 robots x \$33 USD per robot = \$1,023 USD.

If your purchase is made up of multiple bundles, you will be charged the lowest per unit price on all applicable items. For example, a three pack of Edison robots has a per unit price of \$39.66 USD, however in a class pack of 30 robots, each unit is discounted to \$33 USD. An order of 33 robots will be calculated using the discounted per unit price for the class 30 pack for all robots: 33 robots x \$33 USD per robot = \$1,089 USD.

This bulk discounting is automatically applied to orders placed through our website and in the prices listed on the quotes we provide.

### What about shipping and fees?

Your location, how you place your order and the size of your order effect the shipping cost of your order, plus the estimated shipping time, and will impact whether or not your order incurs any additional fees (such as local government import duties). Please see our website for additional information - <https://meet Edison.com/edison-robot-support/shipping-times/>

## Price list – Edison robots and EdCreate

Product	Price (USD)	Price per unit (USD)	Savings <sup>1</sup> (bundle discount)
