Let's download a program from an iPad

Now that you know about Edison and EdBlocks, we can use EdBlocks to tell Edison what to do.
To do this, we need to download a program to Edison.

This time, we are going to load a program that has already been made.
Once you know how to download a program, you can start to make your own programs.

Program Edison

Step 1: Open the EdBlocks app
Go to www.edblocksapp.com
in Chrome, Edge, or Opera.

Step 2: Select 'Menu'
Click on the menu button.

≡ Menu ▾

Step 3: Select 'Load Demos'
Click on Load Demos and select
the program called 'Test_Program.'

📂 Load Demos

Step 4: Program Edison
Press the 'Program' button in the app. (top
right corner)

Step 5 : Screen flasher
Place your Edison V3 over the outline and
press the round button one time, both LEDs
will come on.

Step 6: Download program
Press 'download program' in the download
box, and the program will start downloading
to Edison V3.

Download Program

Step 7: Success
Once downloaded you will hear Edison play
a success sound, now you can disconnect
Edison from the USB port and press the
triangle button to run the program.
